

A large number of new members were elected by the Chamber of Commerce last evening.

TENTH YEAR.

4:00 O'CLOCK A.M.

SATURDAY, AUGUST 15, 1891.

EIGHT PAGES.

FIVE CENTS

HERE IS NO ONE  
between you and the factory door when you buy  
your Piano from the  
OLD RELIABLE MUSIC HOUSE  
—

BARTLETT BROS. & CLARK,  
129 N. SPRING ST.

Go into their Warehouses and see the  
elegant line of

WEBER

PPP 00 N N 00  
PPP 00 N N 00  
PPP 00 N N 00  
S :  
Of which they show all styles from a Parlor  
Upright to a Concert Grand.

THE EVERETT PIANO  
Is also a favorite, and the music-loving public  
appreciate their sweetness of tone and  
wonderful depth of power.

— THEN WE HAVE —

The New Seale Kimball,  
Which is attracting the attention of the  
Musical World and justly earning a reputation  
which is looked upon with envy by older  
but less progressive makers. For a Piano  
that satisfies, THAT IS WORTH EVERY DOLLAR.  
If you are in doubt, you should see  
the Kimball. Great artists have given  
their unequalled endorsement in language  
not to be misunderstood.

We are in the business to stay, and will  
WHOLESALE OR RETAIL  
Pianos at prices as low as  
STRONGLY FIRST-CLASS GOODS.

Don't forget the number,  
129 NORTH SPRING STREET.

Amusement.

GRAND OPERA HOUSE,

## The Los Angeles Times.

EVERY MORNING IN THE YEAR.

BY THE TIMES-MIRROR COMPANY, : : : TIMES BUILDING

N. E. Corner of First and Broadway.

Vol. XX., No. 72

ENTERED AT LOS ANGELES POSTOFFICE AS SECOND-CLASS MATTER

AFTER A YEAR'S BOYCOTT!

268,368!

More Than  
A QUARTER OF A MILLION  
COPIES A MONTH!Sworn Circulation of The Times by  
Month for January, 1881.

STATE OF CALIFORNIA, : : : COUNTY OF LOS ANGELES, : : :

Personally appeared before me H. G. Otis, president and general manager of the Times-Mirror Company, and George W. Crawford, foreman of the pressroom of the Los Angeles Times, who, being both sworn, deposed and say that the sworn circulation of The Los Angeles Times for the month of August, 1881, was 67,750 copies; that the daily average circulation for said month was 6,713 copies; and that the daily average circulation for the months given below was as follows:

For January, 1881, 3,359 copies.

For February, 1881, 5,019 "

For March, 1881, 5,426 "

For April, 1881, 5,533 "

For May, 1881, 5,666 "

For June, 1881, 5,518 "

For July, 1881, 5,657 "

and, further, that said circulation was bona fide in the strictest sense.

(Signed) H. G. OTIS.

G. W. CRAWFORD.

Subscribed and sworn to before me this

1st day of August, 1881.

(Seal) G. A. DOBINSON, Notary Public.

The circulation exhibit in detail for July is as follows:

For the week ended July 1, 60,370

For the week ended July 14, 60,115

For the week ended July 21, 60,115

For the week ended July 28, 61,085

For the 3 days ended July 31, 25,505

Total, 268,368

Average per day for the 31 days.

Gain since August 5, 1880, the day

of the printers' strike against

the Times, 1907.

\* This gain is equal to the entire

circulation of at least one of our

rivals.

THE TIMES-MIRROR COMPANY.

NOTES OF THE DAY.

THE STORE KING is in command up

in Minnesota.

WASHINGTON refuses to pay for tin

soldiers, the gentlemen who "lead

lives of imaginary violence."

CHARLES W. WINDUS, a barber of

Annandale, Wis., has had the un-

speakable gall to slope with two mar-

ried women on the same trip.

MRS. JAMES K. POLK is dead in

"Pork Place," Nashville. She was 88

years old and the widow of the tenth

President of the United States.

BARON HIRSCH is moving for the

establishment of a large Jewish colony

in the Argentine Republic. Lands to

the value of 10,000,000 pesos are to be

purchased.

DR. EDWARD EGGLESTON, author of

"The Hoosier Schoolmaster," is to

marry a Hoosier girl this month, but

whether she is a school ma'm or not is

not stated.

A TEACHERS' INSTITUTE up in Se-

attle has been holding its breath while

it discussed the question, "What can a

teacher do with a boy in school who eats garlic?"

THE census reports only one Indian

left in Illinois. Within the memory

of living citizens they whooped along

the streets of Chicago, and their tepees

were located where now stand the thirteen

and sixteen-story buildings.

BARON HIRSCH is not only casting

his calculating eye upon the Argentine

Republic for the uses of his people, but

upon Asiatic Turkey as well. He

must keep within the zone of trade or he will fail in his colonizing experiment.

ALEXANDER GORDON, a well-known

business man of Elizabeth, N. J., and

James Murray of Third avenue, Har-

lem, have both been driven crazy by

mosquitoes. The bill of the Jersey

skeeter is more potent for evil than

the McKinley bill.

THE new paper up at Redlands

waxes wrothy with one of its neigh-

bors, and calls it "an obscure country

newspaper, stuck to the earth with

very weak paste on the border line

between starvation and civilization."

Good stuff in those Redlands fellows

when you get them stirred up.

"Did he impress you as a man on

the verge of the grave?" asked a Blaine

admirer of the premier at Bar Harbor.

"Yes," replied the boomer, "but the

grave was that of the next Democratic

nominee." And all the premier did

was to smile and execute a depre-

cating gesture. This is important if

true.

THE San Francisco Post thinks that,

notwithstanding the promised success

of the Government experiments for

producing rain by aerial bombardment,

"it is just as well to go ahead perfect-

ing irrigation districts, with good ca-

nals, for several years to come. Land

in California or Arizona 'under a ditch'

will have more attraction in the next

decade for settlers than tracts depend-

ing on balloon-inspired moisture."

GERMANS may find themselves under

the necessity during the coming year

of eschewing their accustomed rye

bread, and chewing wheat or corn bread instead. Hitherto 90 per cent.

of the rye consumed in Germany has

been brought from Russia. Now

comes the Czar's ukase forbidding the

exportation of rye from Russia, and

what are the Germans going to do

about it? The London News, com-

menting on the situation, says: "It is

reassuring to learn that crops in the

United States promise to yield an ex-

ceptionally large harvest. The farm-

ers in America are masters of the sit-

uation, and it is to be hoped they will

use their strength mercifully. Making

corners in the necessities of life was

never laudable, and in the present

juncture it would be little short of

dishonest."

WHAT OF '92?

An Anti-Harrison Republican  
Speaks Out.

A STRONG STAND FOR BLAINE,

With Kindly Mention of Other Can-  
didates, Except the President—  
Concerning Alleged Bar-  
gains and so Forth.

LOS ANGELES, July 29.—[To the

Editor of THE TIMES.] The article re-

produced by THE TIMES from the

Washington Star of July 21, which is

believed to have been inspired by Mr.

Blaine, is attracting attention through-

out the country. The basis of this

article is that Mr. Blaine is out of the

Presidential race of 1892, and has

made a bargain with Mr. Harrison

of which, in return for Mr. Blaine's

getting out of the Presidency next year,

Mr. Blaine is to continue Mr. Blaine's

aid to the State Department, with full swing and uninterrupted away.

This may or may not be true, but as

what has "happened once may happen again," the subject deserves consideration and discussion. If this bargain has been made for a second time, it will be well for the American people to know it; they have some rights left them yet, or should have, and the Republican party of those who by a vast majority desired James G. Blaine for President in 1888, and no other man, who sent delegates to the National Convention for him, do not wish to be traded off again for dead wood.

It is well known that Mr. Blaine

is not the man for the job.

The greater the number of the

people who are put up in the race, the

more it will be for the American people to

## HOUSES SWEPT AWAY

A Cloudburst in San Diego County.

The Little Hamlet of Campo Carried Off by Floods.

Southern Pacific's Fight with Oregon's Railway Commissioners.

Native Sons at Stockton will Keep Open House on Admission Day—Another Great Mountain Fire.

By Telegraph to The Times.

SAN DIEGO, Aug. 14.—[By the Associated Press.] Information has just reached here of a disastrous cloudburst at Campo, this county, on Wednesday. The town is situated at the mouth of a ravine and a torrent of water came down on the town, washing away everything movable. Many head of livestock were killed. No lives were lost.

The information regarding the cloudburst at Campo was brought in by the driver of the stage running from this point to Campo. He says that two heavily laden clouds came in collision above the mountains west of Campo, and their contents were sent down in a deluge. The waters came down the ravine in a torrent fifteen to twenty feet deep and swept over Campo without a moment's warning.

Campo is but a small place with not over eight houses, but with one exception every one of these was swept away, and it was remarkable that no lives were lost. No estimate can be given of losses, but they will not be heavy.

SAN BERNARDINO.

Another Heavy Storm—The Motor Road Repaired.

SAN BERNARDINO, Aug. 14.—[By the Associated Press.] A heavy storm raged for many hours in the mountains east of the city this afternoon. A strong wind came up from the east, filling the valley with dust, so that the landscape was scarcely visible. Soon after the rain commenced to fall at Redlands, and soon the streets were running with water. Probably nearly half an inch fell. The wind shifted again and the rain stopped.

A branch of the storm followed around the mountains, and it rained heavily northwest of this city. No damage was done. The weather is hot and dry.

The Redlands Motor road is repaired completely, and trains are running on time.

Today the Bear Valley Company commenced work on their new dam, to cost half a million dollars. It will require two years to complete the dam to 80 feet. William Hall is examining the Bear Valley water system, and will soon report on the same in connection with the Alessandro and Perris irrigation districts.

THE NATIVE SONS.

Stockton Parlor to Keep Open House on Admission Day.

STOCKTON, Aug. 14.—[By the Associated Press.] The Stockton Parlor of Native Sons is desirous of having the parlors of San Francisco join in the celebration which Native Sons and Pioneers are jointly arranging for Admission day here, but they are deterred from actively trying to persuade the other parlors to come to Stockton in preference to any other city by the fact that they may incur the ill-will of the Santa Cruz Native Sons, as Santa Cruz has been chosen as the place of the official celebration. Aside from that reason for hesitation the Native Sons here are pleased at the chance of receiving the parlors of San Francisco and neighboring cities on September 9. Chairman McNamara of the Native Sons Celebration Committee telegraphed Grand Secretary Lanstedt at Stockton is prepared to do as much as any other city for the Native Sons. Business men here are willing to raise a fund for the entertainment of the Native Sons who come.

RATES REJECTED.

Southern Pacific Defies the Oregon Railway Commissioners.

PORTLAND (Or.), Aug. 14.—[By the Associated Press.] It was learned from an official source today that the Southern Pacific Company will not accept the 10 per cent. reduction in freight rates made by the Oregon Railroad Commission, but will disobey the findings of the commission, thus compelling that body to make a test case in the courts. The company holds that the rates now in effect on its lines are below the rates fixed by the Holt Act of 1890, which it regards as the maximum rate it can charge. The railroad commission estimates that the Southern Pacific's loss of revenue for 1890 on account of the reduction will be \$5000. Manager Koenig, however, estimates the company's loss at \$250,000.

Another Mountain Fire.

SONOMA, Aug. 14.—Mountain fires which have been raging near here during the past three days cause near destroying the handsome residence and grounds of Mrs. Robert C. Johnson last night. Fifty men left town yesterday to fight the fire. They succeeded in keeping it from the house by back firing. The wind changed and took the flames in another direction. It is still burning fiercely through Lovell Valley. Where it will stop no one can tell.

A Burning Barge.

SEATTLE (Wash.), Aug. 14.—The steam barge Rapid Transit, loaded with lime, caught fire at the coal bunkers this evening. A fire boat immediately began to pour ten streams of water into her hold, and it is thought will sink the barge before the hull is injured. The loss will probably be \$10,000.

Refuses to Pay the Militia.

TACOMA (Wash.), Aug. 14.—The State authorities refuse to pay the militia claims incurred when eight companies were called out recently to suppress the mining riots in King county. It is decided to sue the State, and if the militia do not get the money the companies will disband.

Fishermen on a Strike.

SAN FRANCISCO, Aug. 14.—The bark Nicholas Thayer, which arrived last night from Kodiak with a cargo of salmon, brought down 136 fishermen who

struck because the canneries refused to take all the salmon caught, the men claiming that this was the agreement under which they shipped. It is claimed by those interested in the canneries that the agreement was to take 20,000 fish per day, and had they accepted more the over-supply would have to be thrown away, and the canneries could not stand the loss. The fishermen state that the run was a comparatively poor one at the beginning of the season. The strike, it is expected, will have an important effect on the output of the Kodiak canneries this season, as but sixteen fishermen remain in that vicinity. The canneries will endeavor to procure fishmen from other islands.

WIND AND HAIL

Buildings and Crops Damaged Greatly in Minnesota.

ELLSWORTH (Minn.), Aug. 14.—[By the Associated Press.] A terrible wind struck Ellsworth yesterday afternoon, and left the town a pretty complete wreck. The Iowa, Minnesota and Dakota elevators was completely blown to pieces. The Congregational Church was partially blown down. Dwellings and the Burlington depot suffered great damage. Fortunately no lives were lost. The loss will reach \$250,000.

A dispatch from Lake Benton, Minn., says that place was visited by the most destructive hailstorm ever known. Much glass was broken. In the country uncut grain in the path of the storm was annihilated. The storm passed over Fins, Minn., and hail larger than eggs came down for an hour, breaking hundreds of windows and stripping leaves and small branches from trees.

A BOXING TOURNAMENT.

San Franciscans Treated to Pugilism Galore.

SAN FRANCISCO, Aug. 14.—[By the Associated Press.] The light-weight boxing tournament of the California Athletic Club was held tonight. The contestants boxed four rounds. Billy Casey of San Francisco, 136½ pounds, beat John Jones (colored) of Portland, 136 pounds. Bob Baker of Australia, 136½ pounds, knocked out Charlie Roche, 135 pounds, in two rounds. Bob Kane, 136 pounds, defeated Ed Rooney same weight. Fred Cole of Boston was given a decision over Jack Hayes of Boston.

In second bouts Casey defeated Kane and Baker defeated Cole.

The final bout for the first prize of \$300 will occur August 25 between Casey and Baker.

Broker Backer Held for Trial.

NEW YORK, Aug. 14.—The examination of Abraham Backer, the dealer in commercial paper who failed for \$4,000,000 August 3, and who was arrested on complaint of Judge Hardin of Savannah, Ga., charging him with misappropriation of \$12,000 worth of securities entrusted for deposit, and collaterals for a \$10,000 note from Hartman to Backer, took place today. Backer was placed under \$15,000 bonds for the grand jury.

Hives and Bees.

A swarm is to be watched and seen where they cluster and hive them as soon as they are settled. The nicest way in the world to hive a swarm is, when they are clustered on a limb, to cut it off and carry it to a hive. It should be laid down gently in front of the fly entrance and a few bees shaken off and directed to it. If they were all shaken off violently they might again take wing and either cluster again or emigrate. A little smoke should always be at hand to drive them in; with a shepherd's dog drives the sheep into an inclosure. If I am not too busy I do not leave the swarm until they have all settled and change that bee which have just left a hive and did not enter readily one just like it, but it is true. A friend of mine put a swarm in front of a hive and went into the house to mix her bread, and when she returned it was gone. Sometimes I have driven in a swarm with smoke and in a little while they would come out and cluster on the outside. When this occurs I know that the queen never entered the hive, but was hidden under it or the alighting board. In driving a swarm, if I see the queen return, I watch no longer, for I know the rest will soon follow.

A farmer bought a patent hive, and a neighbor coming by who had kept bees all his life, asked him what he was to do with the bees. He was to put them in a box, he said. The old bee-keeper who had always kept bees in a grain or box hive, and when they swarmed cut off the limb and set the hive over it, said: "You will have to cut a hole in the bottom, to put them in." There was plenty of room at the fly entrance to run them in, but he had never seen it done and could not think of any way but cutting a hole. My bees cluster on fruit trees and I do not want to cut off the limb, so I shake them into a dish pan, cover them with an apron and pour them down in front of the hive. When bees are clustered to a point, a light pole which I push up against the limb, will hold them in place, and then I can get them out.

The Y. M. C. A. CONVENTION.

AMSTERDAM, Aug. 14.—Only routine business was transacted at the Y. M. C. A. world's convention this morning.

This afternoon a paper on the missionary work of L. B. Wishard, who has

been making a five years' tour of the missionary world in the interest of the convention, was read by Lord Kincaid. It was a deep impression on the delegates, showing as it did the firm hold the work is taking on educated young men of the Orient and Occident.

ENGLAND'S SUGAR-BEET CROP.

LONDON, Aug. 14.—The continued wet and cold weather has seriously set back the development of sugar-beets. Even with exceptionally fine weather in September it is doubtful whether the increased acreage of Europe will yield increased production. Present tests are on a level with those of 1888, when the final yield was 20 per cent. below the yield of 1890.

TO BE CALLED TO ROME.

ROME, Aug. 14.—It is now considered almost certain that the Pope will, on long, summon to Rome a certain number of American prelates in order to deliberate and consult with them on various questions touching religion in the United States.

THE KAISER'S CONDITION.

BERLIN, Aug. 14.—Aside from the inconvenience of moving about with his leg stiff by bandages, Emperor William is enjoying excellent health.

The fact that the Emperor is able to devote a great part of his time attending to the business of the Empire is regarded as pretty good evidence that the alarming reports circulated in regard to his physical and mental condition are unfounded.

BALMACEDA'S METHODS.

Judges Removed to Make Places for His Tools.

WASHINGTON, Aug. 14.—[By the Associated Press.] The Chilean Congressional envoys in Washington have received advices from Chile which they say confirm the statements heretofore made that President Balmaceda has removed all judges in the country, and has appointed other persons to their places. The envoys say this action of Balmaceda's is in direct defiance of the constitution of Chile, which provides that all judges shall be appointed for life and shall be removed only after being found guilty of malfeasance.

## DR. NEWTON'S NEW BOOK

IT IS SURE TO ATTRACT GENERAL ATTENTION.

The Coming Investigation of This Divine's Teachings—His Personality as a Man—Something About His Charge in New York, the Church of All Souls.

[Special Correspondence.]

NEW YORK, July 27.—Of all the writers of recent fame upon strictly religious or theological subjects none, at least in this country, has secured a wider popularity than the Rev. Dr. Heber Newton. Dr. Newton's lectures have been many. A few years ago he published a small book entitled "Right and Wrong Uses of the Bible." Most of the chapters were revisions of sermons which he had delivered in his pulpit in All Souls' church in New York city. The popular success of this book was enormous. It was printed in a cheap edition between paper covers. Its sale was almost as great in England as in this country. It was translated into one or two foreign languages. It caused that sort of discussion and contention which were genuine in the best of advertisements and it made Dr. Newton's name as familiar throughout the country as it had been for some years in this city.

In this book Dr. Newton stood on broad and what many thought very advanced and almost dangerous ground. His liberality of view was most powerfully attacked by some of the ablest theologians in the church, and was also most ably supported by other theologians. It had one result which became a matter of national interest. In part, at least, to the reading of this book was the view of the Rev. How-

DR. HEBER NEWTON.

ard McQuerry changed in reference to Scriptural interpretation, and he had the same courage of his convictions that has always characterized Dr. Newton. McQuerry, who was a Unitarian, was summoned before an ecclesiastical court and his trial was the subject of an excitement which extended throughout the country. In his trial McQuerry quoted from Dr. Newton's sermons as a part of his argument in defense of his position.

Dr. Newton has within a few days issued a new book, which will be sure to excite attention, perhaps even greater than that which was given to "Right and Wrong Uses of the Bible." He calls it "Church and Creed," and in substance it is a collection of sermons recently preached by him while the fire is now under was just beginning. In this book Dr. Newton takes very strong ground, and it is evident that orthodoxy will be sure to astound, and perhaps shocked, by some of Dr. Newton's assertions. Yet there are many energymen in New York city who are in sympathy with Dr. Newton when he asserts that the supreme question for religion today is whether it is going to be able to revitalize its forms of faith, and thus regain its hold upon the minds of men.

Doubtless this book will be quoted in the approaching examination of Dr. Newton by the committee which is to report whether he shall be tried for heresy or not. If he comes before an ecclesiastical court on a charge of heresy, his book will be put in evidence. Dr. Newton himself says that that is his desire, that he will stand or fall by what he has there written; that he will defend it in the church if may be, out of it must be. If such a trial takes place it will be an event in ecclesiastical circles in the United States. It will excite extraordinary interest.

Dr. Newton personally is not a man to suggest the defiant fighter. He is a slender man, whose stooping shoulders make him look older than he really is. He has dark eyes, dark hair, a pale countenance, and his manner suggests rather the student or the bookworm than that of a priest who has hurled defiance at his associates and has dared to say that certain current beliefs are erroneous, and that so-called orthodoxy is too rigorous and inexact.

He speaks in private with a sort of nervous rapidity of utterance, sometimes hesitating as though his thoughts came too fast for his tongue to articulate them. Unlike some other theologians he cannot be induced to go into personalities. He talks with eloquence about the contention and in defense of his views, but his mouth is sealed when it is suggested to him that possibly some of the detractors which he has made are due to the fact that he has obtained a greater prominence than some of his associates.

Dr. Newton's Church of All Souls is situated in the upper part of Madison avenue, right in the heart of aristocratic New York. Some of the men famous for activity in the professions and in business are members of his congregation. They stand by him to a man. His popularity with his parish almost approaches idolatry. His church on Sunday mornings is one which has no empty seats, and during his services no man feels the temptation to drowses on. In his pulpit Dr. Newton makes no pretense to oratorical display. He is not rapidly, but distinctly, his gestures are few. His great merit as a speaker is his earnestness and the lucidity of his thought. His sermons are short—so short frequently that his congregation hear him say "Amen" with regret.

Although a popular New York preacher Dr. Newton does not live in New York. His health is not overstrong, and he finds that the country air is not only beneficial, but requisite. He therefore lives in Garden City, on Long Island, about an hour's distance away by rail or ferry from his church. He comes in at least three times during the week, sometimes often, and is usually to be seen at the church during those hours which are set apart for parish business. He has been engaged in the summer in a careful examination of the history of the creeds and of the thirty-nine articles, so that he may be prepared for his defense in case he is called to trial.

E. J. EDWARDS.

Expenditures for Postage.

A statistical publication issued by the French ministry of finance includes among other things a statement of the postal expenses of the chief nations of the world. It appears that 1,500,000,000 francs is spent annually on postage. Of this amount the United States of America come in for the largest share, 300,000,000 francs postage, without telegraphic communication. Next comes Germany, spending on postage and telegraphic communications 382,000,000 francs. Great Britain spends 157,000,000 on postage alone. France spends 143,000,000 on postage and telegraphs. Russia spends 97,000,000 and Austria-Hungary 96,000,000 francs on postage and telegraphs. The smaller governments spend from 40,000 downward.

A child with two tongues was born the other day at Huntington, W. Va. It was a female child.

## BUSINESS.

## OFFICE OF THE TIMES.

LOS ANGELES, Aug. 14, 1891.

Fresh ranch eggs were weaker today and prices declined. A carload of eastern eggs came in and more are expected. The eastbound consignments, as a rule, are said to be good order, but have to be disposed of quickly.

The butter market showed further weakness today, and prices were 2½¢ lower all around. The drop is mainly due to liberal supplies of eastern butter which have been coming in for some time past.

Sales of California fruits in eastern markets today are reported as follows:

CHICAGO, Aug. 14.—CATTLE.—Receipts

5,600; light, strong to shade higher

steers on sale; Texas, 2,500@25; range

steers, 2,750@25; steers, 2,000@25;

hogs, 1,000@18; packers and mixed, 4,23

0@40; packers and mixed, 5,000@37½;

prime heavy and butchers, 5,400@

5½; prime, 5,70@5@50.

SUNYRA, 12@15c.

GREEN FRUITS—Bananas, (Honduras)

2,000@2½ per bunch; apples, per box, 1.00

4.00; Navy, small, 3.30@3.70; Garbanzo

3,500@4.00; lentils, 9.00@10.00.

BOYS—Close, 30@32; Peaco, 30@31;

30@32; Peaco, 30@31.

LIVE STOCK.

CHICAGO, Aug. 14.—CATTLE.—Receipts

## PASADENA.

Times Branch Office, No. 50 East Colorado st.

## A DAY'S HAPPENINGS.

Handsome New Coaches for the Terminal.

## A SIX-ACRE REAL-ESTATE DEAL

Universalist State Convention Trustees Meet—New Arrivals—Private Brown's Fine—Personal and General.

Eight new and superior passenger coaches have been received at Los Angeles by the Terminal road. They are five feet longer than those now in use, and are of the "camel back" variety, fitted with extra large package racks and Pullman lamps. They are fitted up to be heated by steam to be supplied by the engine. At present Pasadena will only set them occasionally, for they are to be run only in emergencies. When the Long Beach line gets to running they will be put on that run.

## A QUIET SALE.

A sale which has not been reported yet, but which occurred several days ago, was that of six acres in the Mrs. Carr tract, near Colorado street and the Alameda Railway track. Charles Legg was the purchaser, and succeeded in keeping it pretty quiet, but as usual, the TIMES effected a "scoop," and presents the same here-with. The price paid was not to be ascertained.

## LOCAL POINTS.

Overland eleven hours late. The weather yesterday was a little warm.

New arrivals in Pasadena who will probably remain as permanent residents are the family of J. T. Messer, who come from Michigan with re-stored health as an object.

Private George Brown paid his 25-cent fine and costs, amounting to \$7, rather than have the case brought up. The fine was inflicted for failure to clean his gun under orders.

The trustees of the Universalist State Convention met today in the church here and transacted routine business. They have under consideration a census of the denomination in the United States.

The various churches held choir meetings for practice last night.

Yesterday was a light day on the railroads. Few persons left town.

The audience of Capt. Anderson's property, on his chicken farm at San Gabriel, was rather unsatisfactory, most things going at very low prices.

By an error yesterday, the paragraph regarding Agent Prince of Wells-Fargo Company, might be construed as lacking in detail. It was unintentional, as nothing but respect can be felt by all who know him.

The Board of Equalization, at its meeting yesterday, granted Charles Legg a reduction of \$1400 on his building, east half of lot 1, Mojave tract.

The Council meets today at 1 p.m.

It is given out that no action on the Cross franchise will be taken without mature deliberation and due investigation.

As the result of the trip Thursday to Devil's Gate by officers of the water companies and City Engineer Sedwick, the proposed tunnel will become a material fact. It will apparently solve the insufficient water-supply question.

## PERSONAL MENTION.

C. Mulholland of Independence was in town yesterday... T. P. Lukens and Fayette Dyer are down from the peak... Mr. and Mrs. John Handy have removed to San Diego as a residence... Mr. and Mrs. C. S. Pratt of Ontario are the guests of Mrs. J. B. Stoutsenberry, North Euclid avenue.

C. H. Bradish, a prominent member of the Standard Sewing Machine Company, is in town on business... from Cleveland, O... Mrs. L. L. Burger... Hon. W. L. Hardin... Santa Paula is the guest of Rev. E. L. Conger... Prof. Keyes of Riverside is in town... J. T. Messer is in River side... Miss Lillian Magee is visiting with the family of W. B. Laugherly... Cal Hartwell was in yesterday from Santa Monica... E. H. Turner and party have departed for Catalina, bent on sailing and fishing... J. O. Downing of Berkeley is in the city... W. A. Watson is here from Alhambra... Agent Levy of the Capitol mills was in town yesterday.

Fruit scarce in the East.

[Ottario Observer.]

Notwithstanding reports to the contrary, the fruit crop of the East is much below the average. Nearly all of the fruit products east of the Rockies will be consumed in a green state, and in consequence California will be the only source of supply for dried fruits. The amount of dried peaches in the East will be a vanishing quantity, compared to the amount which will be demanded. Dried peaches, apricots, nectarines, etc., will be in great demand at high prices, and all growers who dry and hold their fruit will reap profits which they have never before been able to do. More than ever are we convinced that it will pay the growers better to cure their own fruit than to sell it green at the ruinous prices offered them.

## Banks.

[Chino Champion.] Richard Gird now has his stockyards south of town completed, with a capacity of 1000 head of cattle. The spur track of the Chino Valley Railway will soon be finished from the east side of the sugar factory, where the beet pulp will be loaded on the cars, to the yards. Mr. Gird will feed beet pulp extensively this fall, and there is no doubt that the beet turned out will be of first-class quality. Henry T. Oxnard has written the following regarding the beet pulp.
